

Leading Automation Company in Puerto Rico Joins Rockwell Automation Partner Network Program

PACIV Inc. becomes a Rockwell Solution Provider in Puerto Rico

PACIV

L eading Automation Company in Puerto Rico Joins Rockwell Automation Partner Network Program

San Juan, PR, June 25, 2010 — PACIV, Inc., a Puerto Rican company, recently joined the Rockwell Automation Solution Provider program, part of the company's PartnerNetwork framework of specialists in industries, applications, geographies, technologies and services around the world.

PACIV provides its clients with extensive knowledge in the design, implementation, project management and maintenance of Rockwell Automation industrial control systems.

The Solution Provider program requires that PACIV continually enhance its professional competencies and product knowledge. Additionally, the Rockwell Automation Solution Provider program provides PACIV with extended access to automation products, services and tools required to design, implement and support automation solutions.

For over 13 years, PACIV, Inc. has been serving the manufacturing industry on the delivery of new capital projects as well as sustaining existing manufacturing operations in the areas of control systems, instrumentation and regulatory compliance services. PACIV services in the manufacturing industry and its satisfied customers have taken this locally owned company globally with offices in Puerto Rico, United States and Europe, while maintaining its local appeal.

Rockwell Automation, Inc. (NYSE: ROK), the world's largest company dedicated to industrial automation and information, makes its customers through its solutions more productive and the world more sustainable. Headquartered in Milwaukee, Wis., Rockwell Automation employs about 20,000 people serving customers in more than 80 countries.

“The synergy created with this new partnership, cost-efficient automated solutions, will give the needed competitive edge to our local manufacturing industry in the global market. It will allow manufacturing and process industries to enhance production capability, optimize manufacturing plant performance and achieve operational excellence through automation”.
