

Can Puerto Rican Firms Compete Globally?

PACIV's Harvard Business School case study was presented last Monday by Prof. Locke @ MIT Sloan School of Management to approximately 30 MBA students. Jorge L. Rodriguez was present at the class to share his insights with the students and answer their questions. It was the 5th time that the case study was presented in an MBA curriculum of an Ivy League school. It was the 5th time world-class students from all over the world got to know not only PACIV and what we are about but also Puerto Rico and our socioeconomic history. Most importantly, our significant footprint of biopharma and medical device sites, our people, and our culture...truly beyond our beloved shores."
